hrvatska udruga oracle korisnika

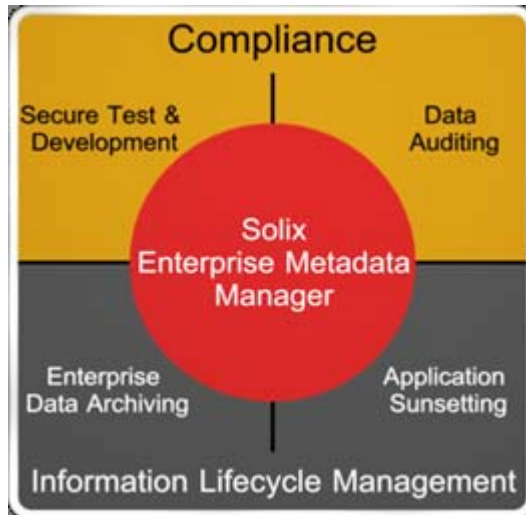

- **Presentation**
  - Company
  - Data Management Challenges
  - Available options and best practices
  - SOLIX EDMS Single Point solution
  - Architecture
  
- **Q&A**

## Company Facts

- Founded: 2002
- US Headquarters
- India R&D Center
- Privately held
- Oracle Certified Partner
- Offered by Oracle as an embedded feature in Oracle Banking application(OFSS)

## Solix Enterprise Data Management Suite

## The Solix Vision

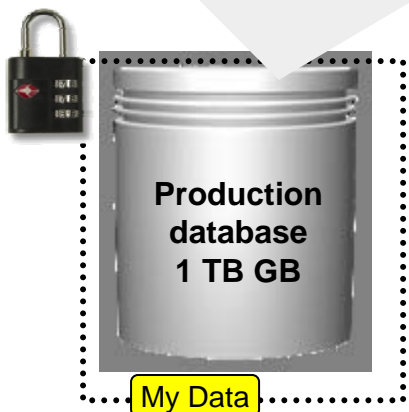

Enable our customers to optimize their enterprise application infrastructure investment:

- Optimize application performance thereby improving workforce productivity
- Optimize computing costs required to manage the rapid growth of enterprise data
- Optimize the total data burden from an enterprise application through effective management of test & development data

**Solix is Committed to 100% Customer Success**

## Production

1. As production databases grow, application performance is impacted slowing down business processes

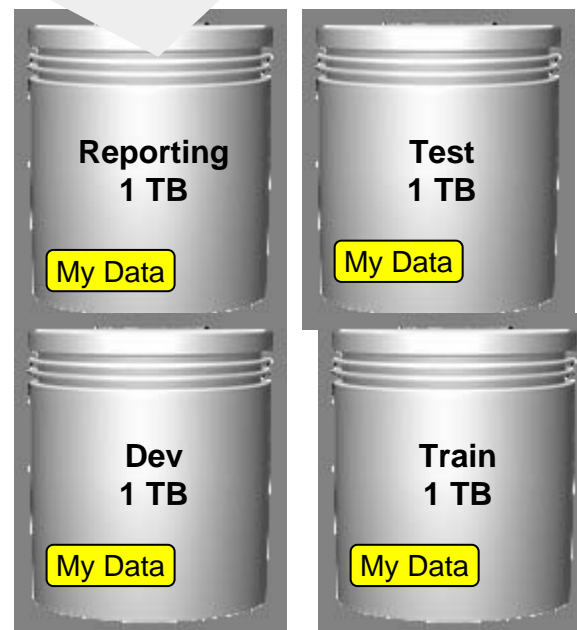

Production systems are copied for test and development purposes

2. Copies made for development are not monitored or audited and invite security risks

## Less Secure & Costly Production Support

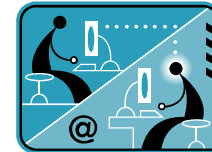

3. Resource requirements grow exponentially with each test copy increasing TCO

- Data Growth
- Application Performance
- Strenuous backup/restore/upgrade/cloning
- Consolidations/Single Instance

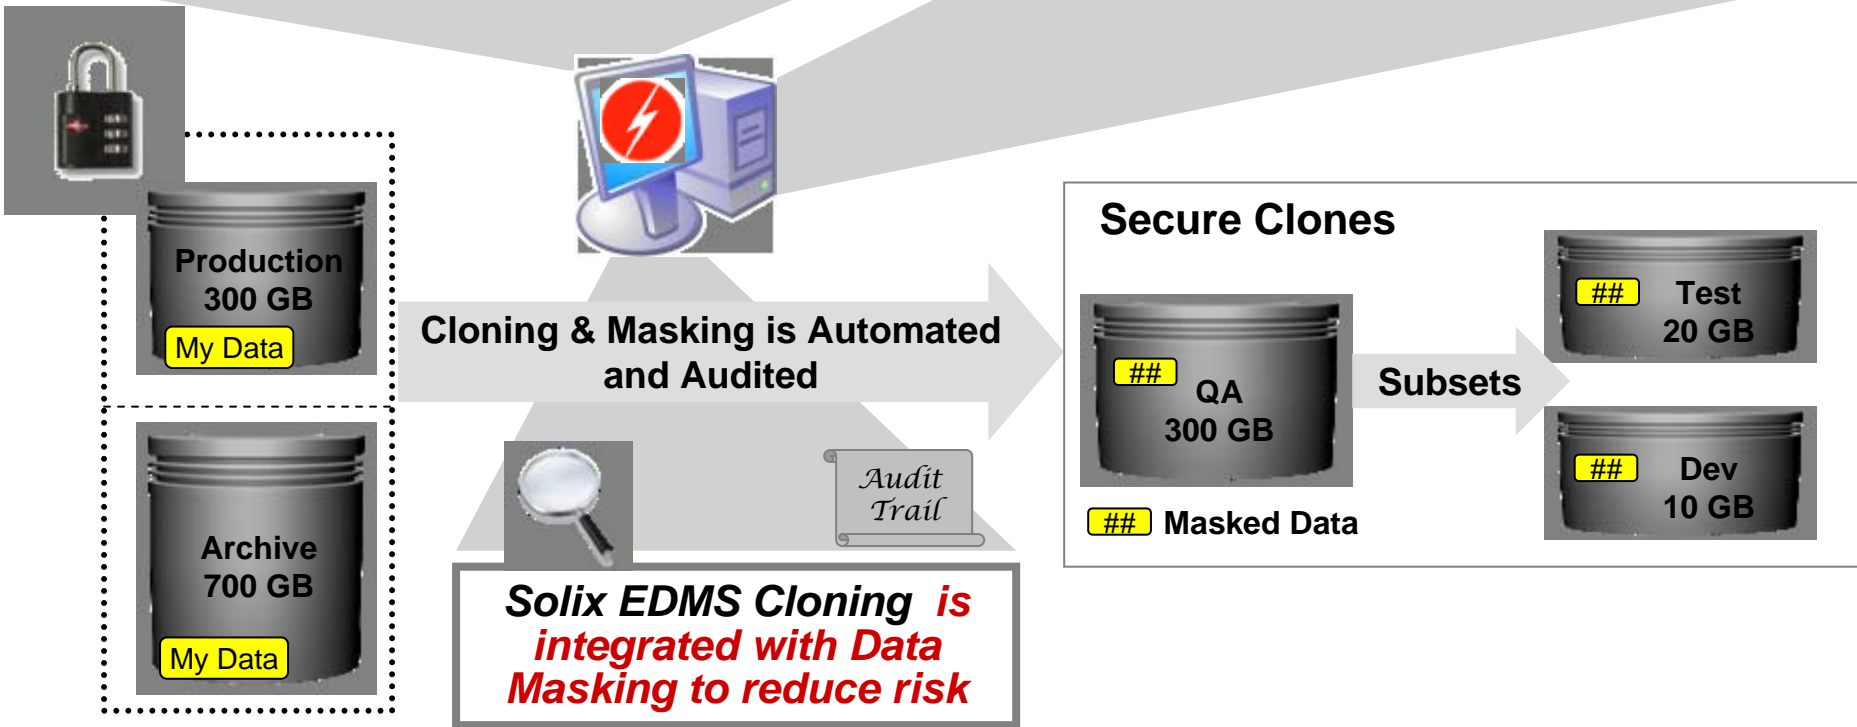

- Storage Costs
- Data Security
- IT Costs
- Enterprise search

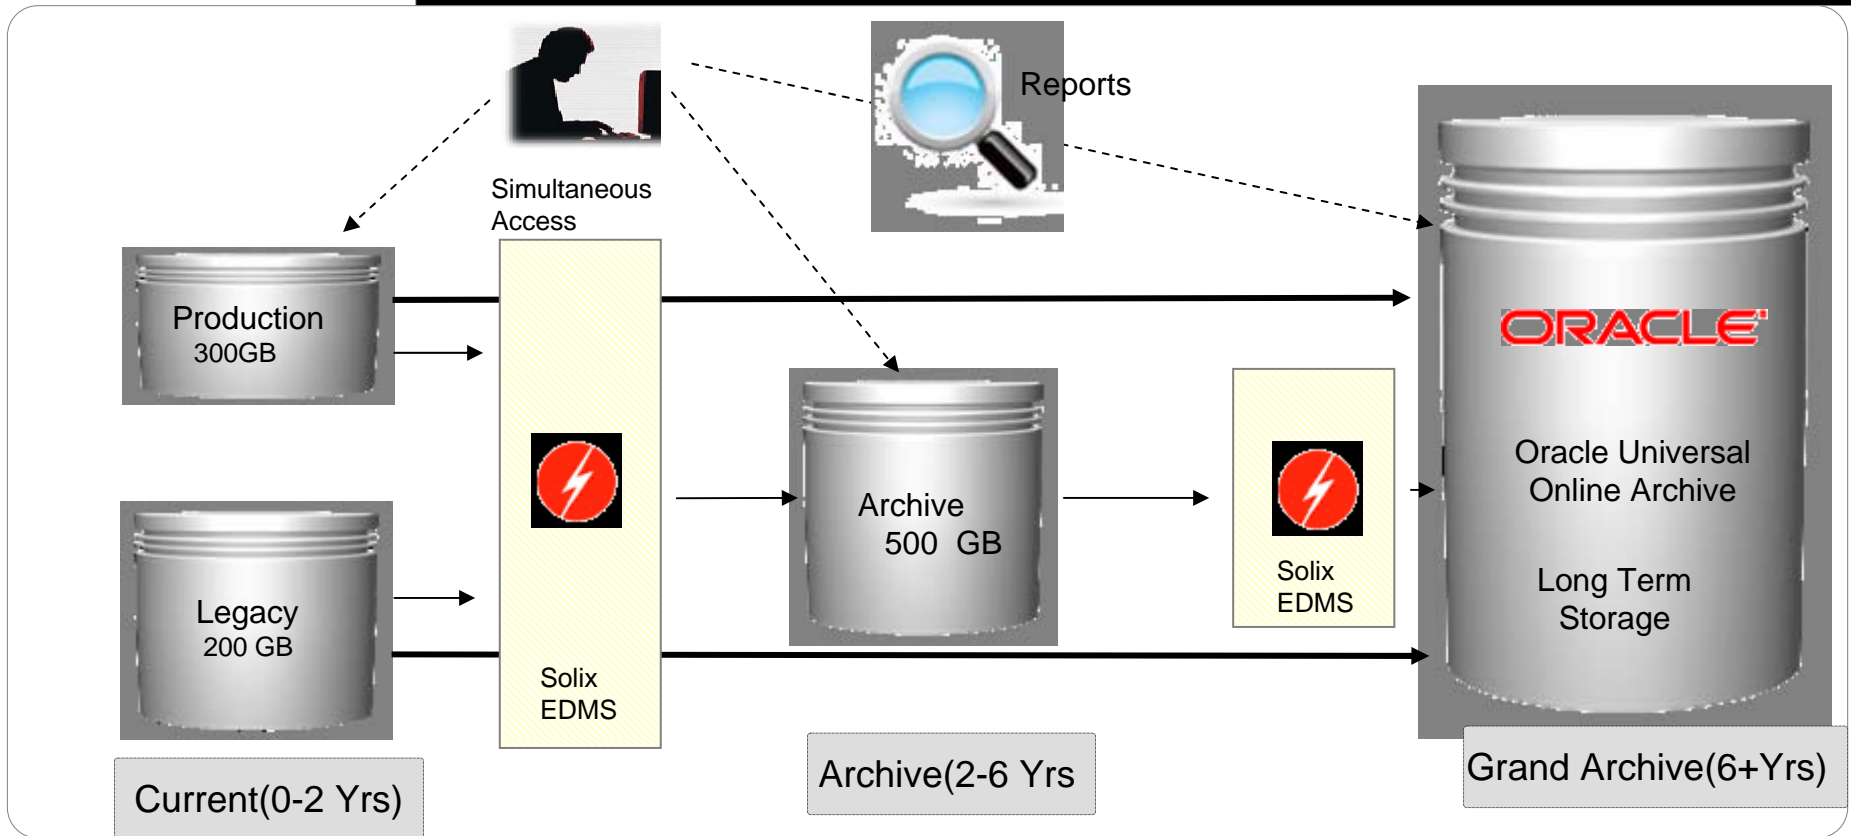

- **Increase spending on hardware**
  - Short term solution
  - Never ending
- **Increase DBA effort on tuning**
  - Costly and time consuming
  - Marginal improvement
  - Tuning only goes so far
- **Purge historical data**
  - Regulator require more data not less
  - Difficult to get Users buy-in
  - Legal needs data for litigation protection
- **Implement Archiving Solution**
  - Relocate historical data
  - Keep only active data in Production
  - Stabilize growth of production system and maintain consistent performance

**Solix EDMS Enterprise Archiving**  
*for production applications or retirement of legacy applications*

**Solix EDMS Secure Subsetting**  
*removes large sets of data*

- De-Archive
- Patch Synchronizer
- Integrated Space Reclaimer
- Scheduler & CLI
- Post archiving consolidation

- Simultaneous Access
- Analytics
- Grand Archiving- XML,CSV, WORM
- Data Compression

# Solix Configurator – 4 Steps
