October 2012 Oracle User Group

Engineered Systems – Winning the XLOB Battle for IT

Michael Bürger – Engineered Systems Sales South East Europe

Agenda

Oracle Engineered Systems

Extreme Performance. Fastest Deployment. Lowest Cost.

- **The Business Need by Analysts**
- **Overview Engineered Systems**
- **The Business Value Created By IT**
- **Conclusions and Next Steps**

ORACLE

The Business Need

The Common Business Problems Today

There is a market for Exadata

- **Data explosion**
 - how to manage more data with same headcount?
- **Maintenance**
 - how to automate freezing of more for new projects?
- **IT cost pressure**
 - budgets are flat or down, where to save something?
- **Performance**
 - business user XLOB satisfaction before and after migrations?
- **Other?**

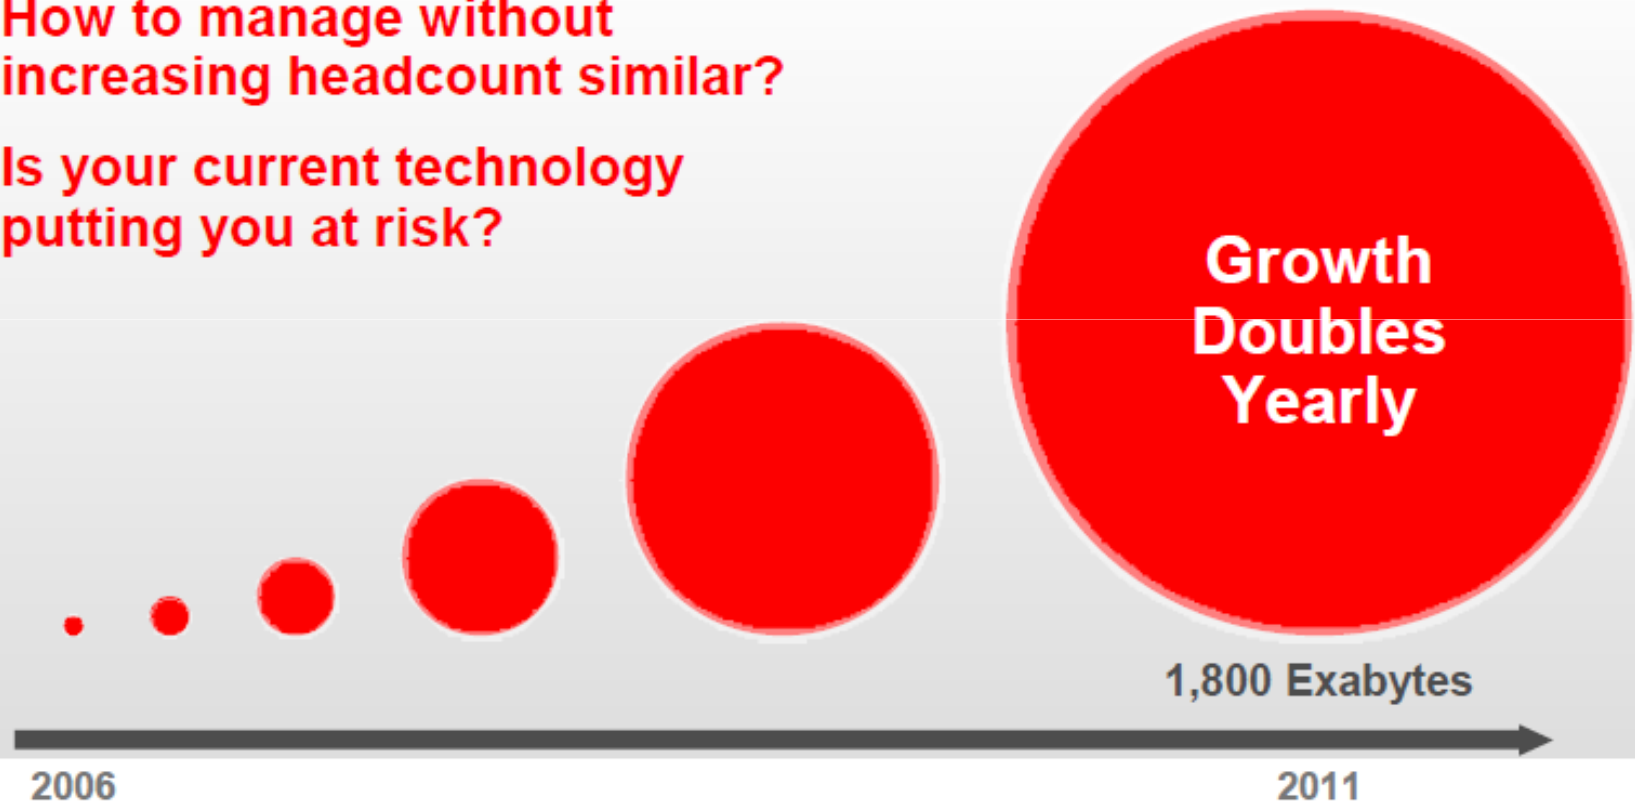

ORACLE

More **data** than ever...

Tripling in size every two years!

How to manage without increasing headcount similar?

Is your current technology putting you at risk?

http://www.kurumsalyazilimlar.com/oracle_campaign/Exadata_demo/LP/

ORACLE

Data source: IDC, 2008

Database-to-DBA ratio is increasing: 1990-2015

Higher costs than ever...

IT budgets are flat or down...

...but Data Centre costs, which are 25% of total IT budget, are increasing at 20% per year...

...and service execution is below par.

KEY DRIVERS

- 40% growth in transaction volume
- Massive growth in volume of data
- Increasing power and cooling costs
- Difficulty in deploying new apps and unpredictable workloads
- Focused cost reduction push across all expense items

CIO's Face a Challenging Context

Can we be successful without transformation?

Cost Of Downtime

**Q14: What would you estimate is the cost of an hour of downtime for each of the following in your organization?
(Means shown)**

Source: Symantec 2010 Disaster Recovery Study

The XLOB Battle a Challenge for IT?

 <p>DWH and BI Management in Sales, Controlling, Board Members</p>	<ul style="list-style-type: none">• Need the batch report daily not weekly, how to run it in in much less than 16 hours without impacting the daily on-line window?• We are losing market share, how can we get much more detailed ad-hoc queries daily but without impacting application user performance? Resource Manager
 <p>Application Users Sales, Production,</p>	<ul style="list-style-type: none">• How can we ensure the next version upgrade can be switched on without project delay and provide much more than 20-30% performance gain on always higher availability?
 <p>CFO and CEO</p>	<ul style="list-style-type: none">• Why we need to fund such big machines as the peaks are just 3 days monthly?• How we can consolidate something as the overall IT costs are too high and we need to bring more projects to the street by unfreezing our best experts rather than logging in our key resources in maintenance and integration tasks?

How to solve the business problem today?

- As usual via more storage?
- Via more servers or new one's to be announced?
- Via more room space?
- Via more power supply costs?
- Via new IT stuff or outsourcing?

Traditional approaches doesn't solve the problem. The business challenges today requires a new way of thinking.

1886 - 2011 what's the difference?

The German Kaiser Wilhelm I: “I believe in the horse, there is nothing else replacing it for years!”

Exadata is transformational

Providing a step change to the business

Oracle on Oracle

This is how we procure systems today!

ORACLE

Public usage, michael.buerger@oracle.com

.. and then put them together!

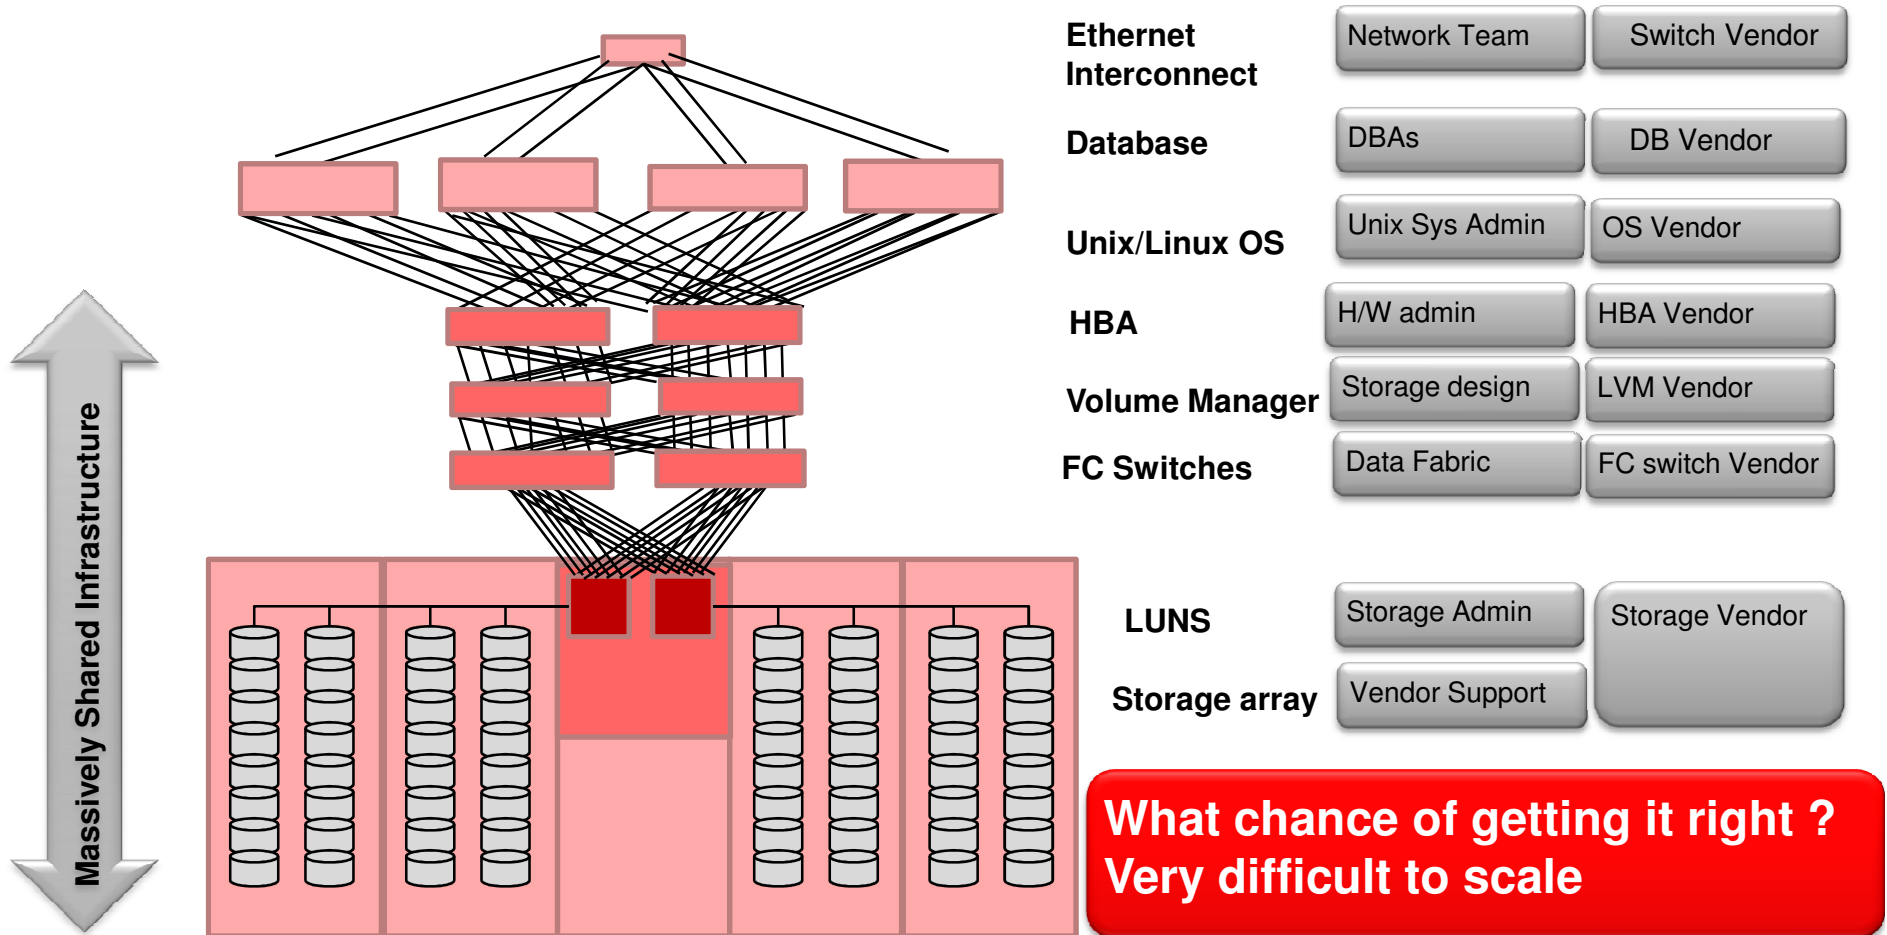

ORACLE

Public usage, michael.buerger@oracle.com

Typical Technical Architecture

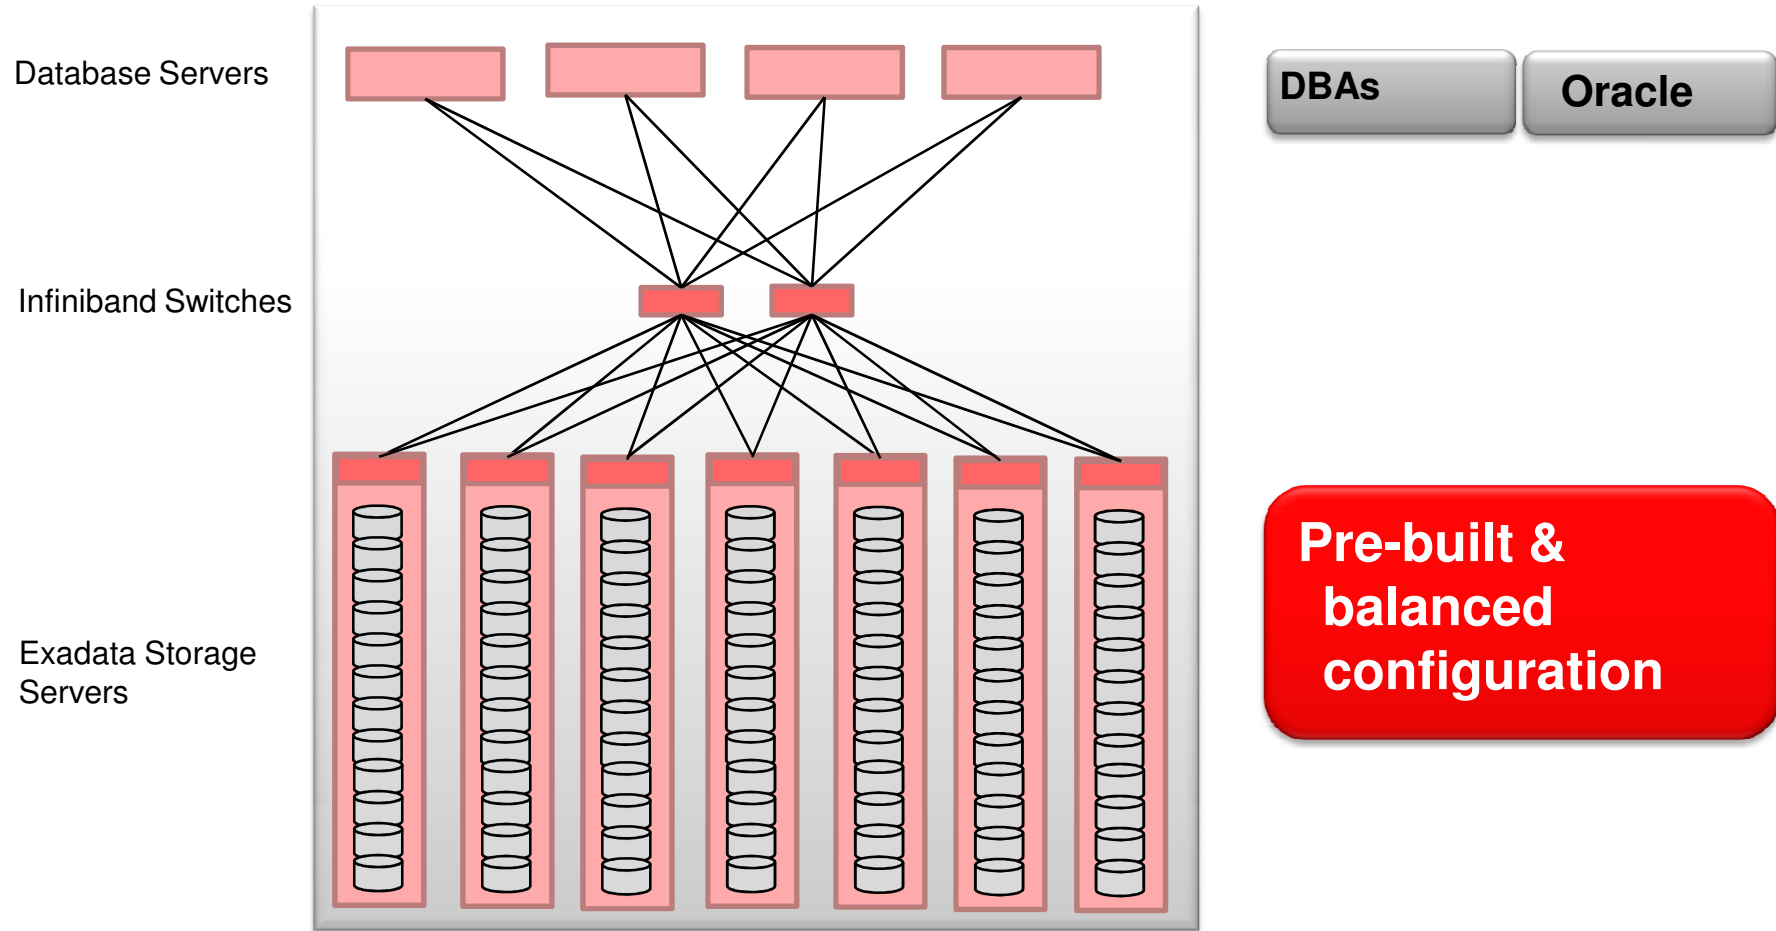

7 Racks, 128 connections, 7 teams, 7 vendors, **to achieve 6 GB/s**

ORACLE

Oracle Exadata Database Machine

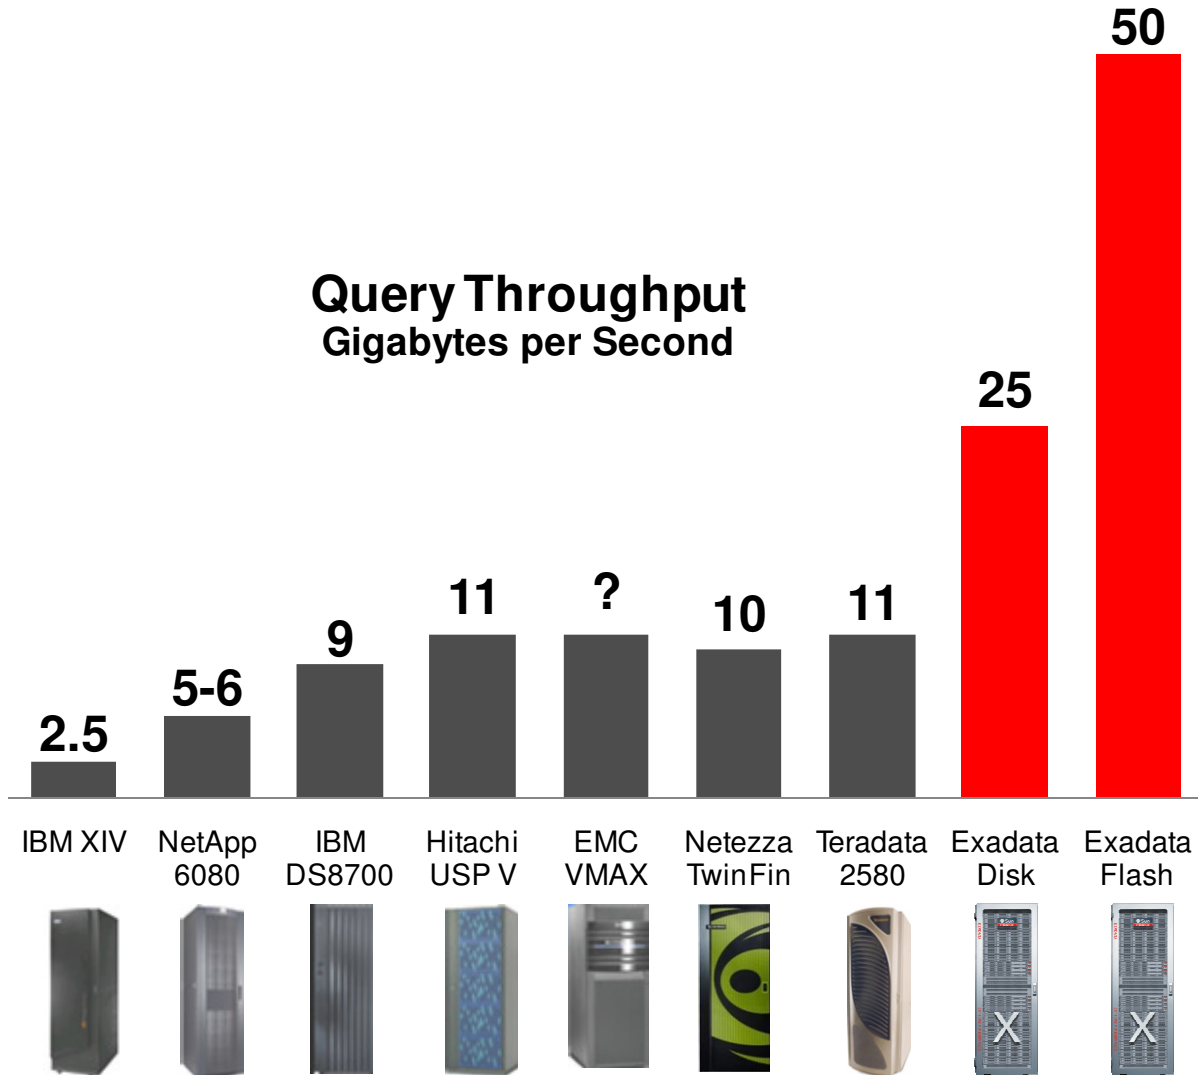

Simplified Technical Architecture - Half-Rack, **still 12.5 GB/s**

Pre-built & balanced configuration

Query Throughput Advantage

Flash + disk bandwidth, **75 Giga Bytes/second**

ORACLE

Complete Family of Database Machines

Flexible choice, add as you grow

Oracle Exadata X3-2

Oracle Exadata X3-8

Eightel

Quarter, Half

Full, Multi-Rack

Full-Rack

Multi-Rack

ORACLE

Exadata Innovations

Exadata Storage Server Software

- **Intelligent storage**

- Smart Scan query offload
- Scale-out storage

- **Smart Flash Cache**

- Accelerates random I/O up to 30x
- Doubles data scan rate

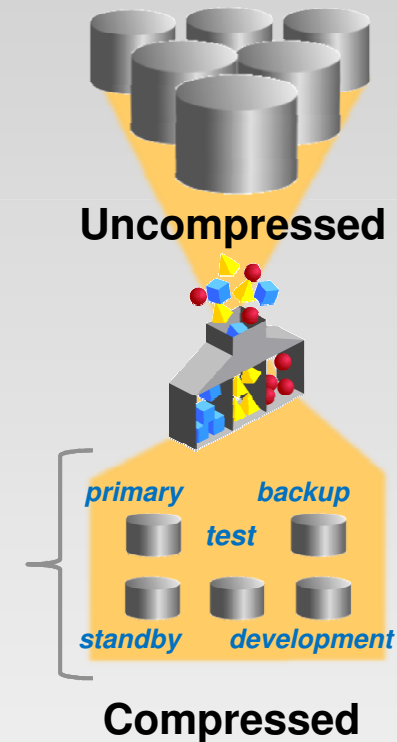

- **Hybrid Columnar Compression**

- 10x compression for warehouses
- 15x compression for archives

Data remains compressed for scans and in Flash

Benefits Multiply

ORACLE

The business case...

Revenue from Infrastructure Underlying Oracle Database Instances by Technology – Traditional Database Model vs. Oracle Exadata Database Machine

US\$ in millions, unless otherwise stated

	Traditional Database Model	Oracle Exadata Database Machine	\$ Difference	% Difference
Server	\$4,670	\$4,670	-	0%
Storage	\$4,770	\$2,359	(2,411)	-51%
Storage Software	\$859	\$2,745	1,886	220%
Networking	\$946	\$-	(946)	-100%
HBAs	\$308	\$-	(308)	-100%
Total	\$11,553	\$9,775	(1,779)	-15%

Source: IDC, Gartner, Credit Suisse.

Performance up 10 times

CapEx less 15%

OpEx less 10% annually or more

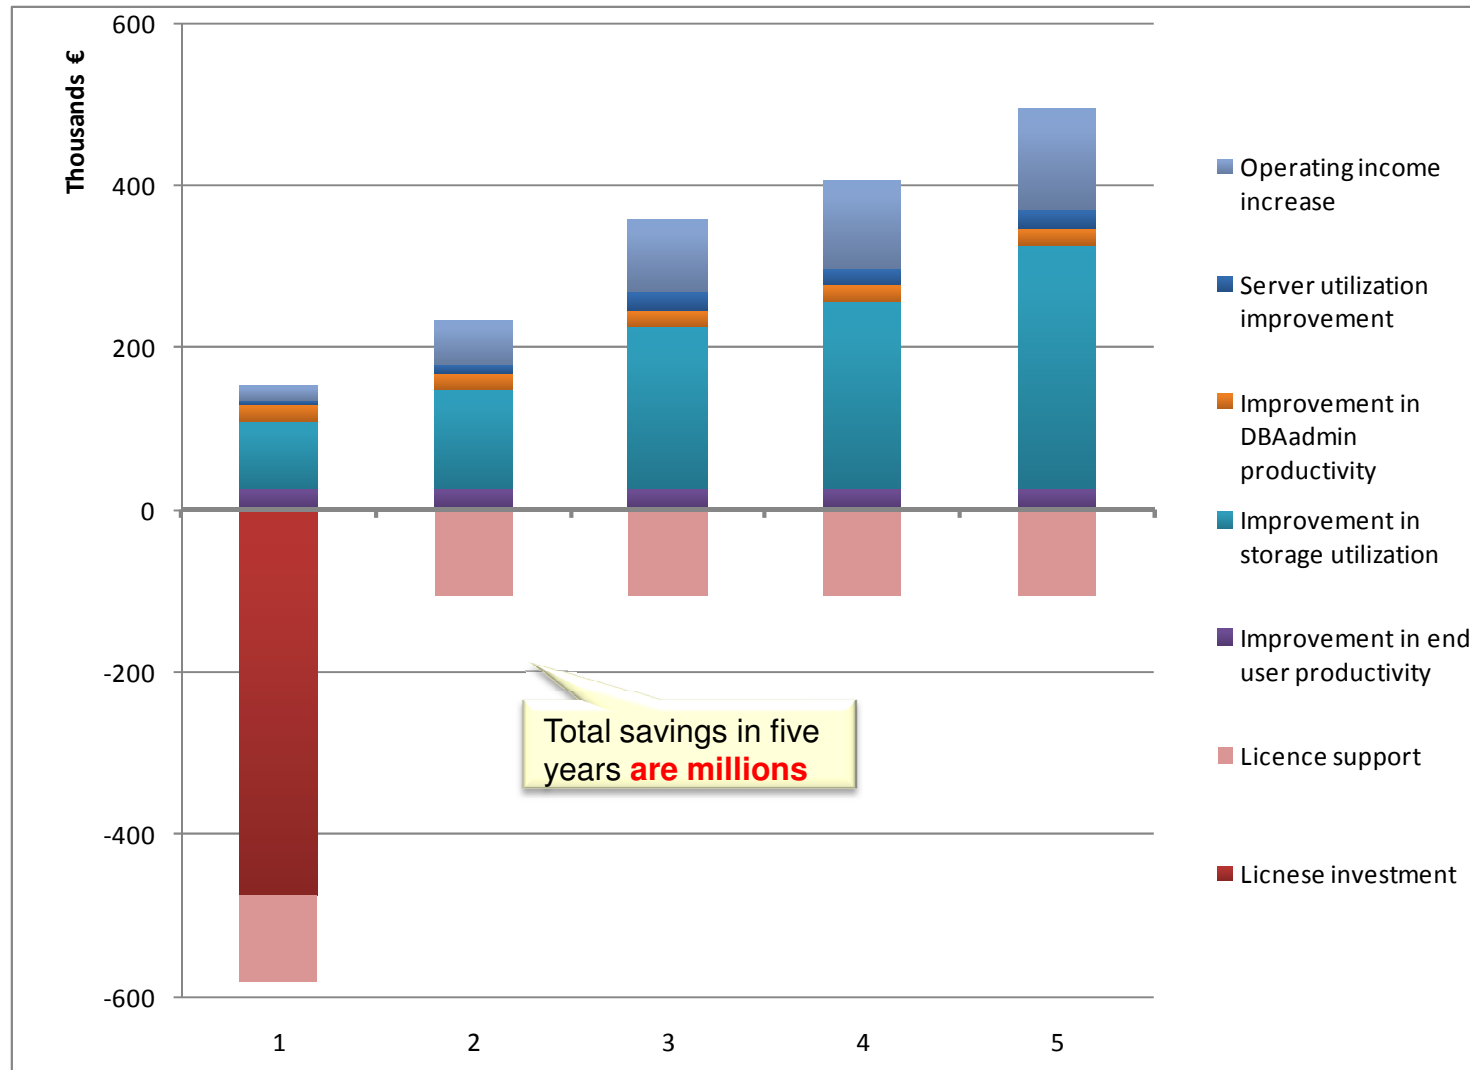

- Server and Storage
- Networking
- Floor space, Power Supply
- Database maintenance

Engineered Systems

Analyst Info on RDBMS Market

IDC: RDBMS*						
	Rev. 2010 (\$USM)	Rev. 2011 (\$USM)	Growth 2010	Growth 2011	Share 2010	Share 2011
Oracle	10,114	12,119	13.0%	19.8%	44.7%	46.6%
IBM	4,662	5,132	5.0%	10.1%	20.6%	19.7%
Microsoft	4,599	4,984	12.4%	8.4%	20.3%	19.2%
SAP	697	1,004	2.8%	44.0%	3.1%	3.9%
Teradata	789	899	19.5%	13.9%	3.5%	3.5%
Fujitsu	237	264	-2.7%	11.4%	1.0%	1.0%
Progress	216	222	9.8%	2.6%	1.0%	0.9%
Total	22,603	26,004	10.3%	15.1%		

Source: IDC WW Software Market Forecaster 2012, May 15 2012

- **Oracle market share up from 44,7% to 46,6%**
- **IBM, by contrast, saw its share decrease from 20.6% to 19.7%.**
- **Microsoft's share declined from 20.3% to 19.2%.**

How to migrate to 11gR2?

- **Migration effort depends on the source**
- **9i, 10g to 11g better with EM RAT**
- **In hours or days with O2O**
- **In minutes with triple O (Oracle to Oracle Online) with Oracle Golden Gate**
- **Tool based migration from any third party database source with Ispirer**

New 11g Database Options

Reduced Exadata delivery time creates DBO revenue opportunity

Faster hardware based encryption plus won time for DB Vault

**Enterprise Manager 12c with capacity planning, chargeback.
RAT includes SPA and real workload testing for 11g migration.**

**Active Data Guard, Activation of back-up site for reporting.
Advanced Compression for massive storage cost savings.**

**11gR2 Exadata, managing more data volume on less costs.
10x DWH and 2x OLTP improvement based on unique
Exadata Storage Server Software. Delivered in weeks not
months.**

ORACLE

Engineered Systems

One Sentence Description of Each System

ENGINEERED SYSTEMS			
SPARC SuperCluster	Exadata	Exalogic	Exalytics
Engineered clustered system for general purpose computing. Designed for enterprise consolidation of Oracle and third-party applications and database environments	Extreme performance database system for consolidation, data warehouse, OLTP, and mixed workloads	Extreme performance optimized for Oracle Apps, Oracle FMW , can run 3 rd party apps	Extreme performing in-memory and middle tier analytics platform
Oracle Database Appliance		Big Data Appliance	
Complete, affordable HA database system for the mid-market, optimized for ease of use		Expandable Hadoop and NoSQL based system, optimized for acquiring, organizing, and analyzing low density and unstructured data.	

GENERAL COMPUTE SERVERS			
X Series	Midrange M Series	High End M Series	T4 Series
General purpose compute x86-based alternative for running Oracle VM and the Oracle stack	Midrange, highly available, and scalable SPARC server for database and general purpose applications	High end, mission critical. and scalable SPARC server for large single instance database and general purpose applications	Scalable SPARC performance server for both multi- and single threaded applications , including database, and general purpose applications

ORACLE

Utilities

Oracle Exalytics In-Memory Machine

“We realized **a five-fold improvement in database query performance** with Oracle Exalytics. Interactively data is available for 360° view from highest to detailed level. We save time and energy as time consuming Excel download is obsolete. With Oracle Exalytics, we will be able to deliver data faster and give users an improved experience in terms of the interactive visualization. I am excited about the potential for Oracle Exalytics to take business intelligence at Key Energy Services to the next level.” – **John Hood, Vice President and Chief Information Officer, Key Energy Services, USA**

ORACLE

Public Sector

Oracle Exadata Database Machine
Oracle Spatial

“With Exadata versus competitive platforms, our Oracle Spatial based solution runs 3x faster. For example 98% of refresh completed in 6 days versus 3 weeks.” - Atri Kalluri
Assistant Division
Chief Spatial
Management

Benefits Realized so far

ORACLE

High Technology

Oracle Exadata Database Machine
Oracle Exalogic Elastic Cloud

“Exalogic exceeded our expectations by 3-22x in both **response time** and **total throughput**, compared to our Java EE Application formerly deployed on IBM WebSphere with IBM MQ Series Messaging on IBM p570. We migrated the Application to Oracle WebLogic with its embedded Messaging System.”

ORACLE

Cloud Service Provider in China replaced IBM with Oracle Engineered Systems

Exadata is the Architecture of the Future

Massively Parallel Grid

Best Platform Data Warehouse Migration

8i, 9i, 10g, 11gR1, Teradata, DB2, SQL, Sybase, BW

Get same reports faster, execute more reports

Best Platform for OLTP

EBS, Siebel, PeopleSoft, JDEdwards, iFlex, SAP, ISVs

Improve SLAs with business lines, reduce IT costs

Best for Consolidation and Cloud

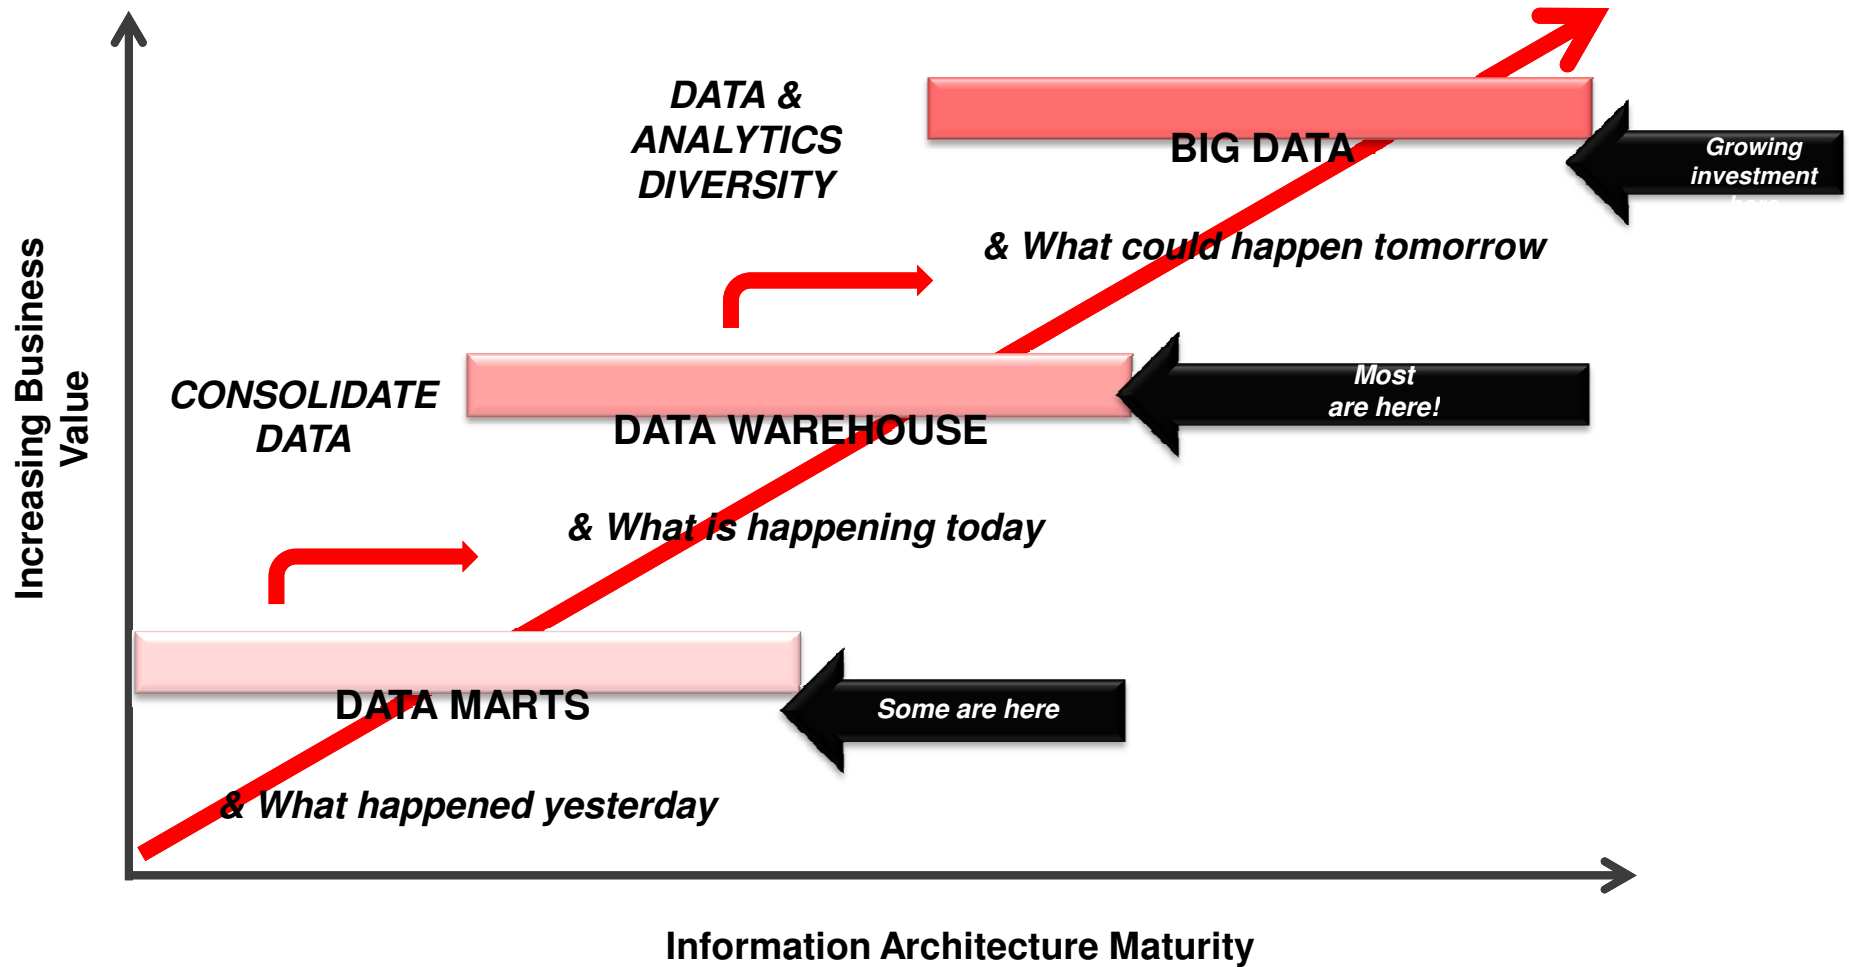

Enterprise Data Integration front, to middle to back office

Make current budget available for new projects

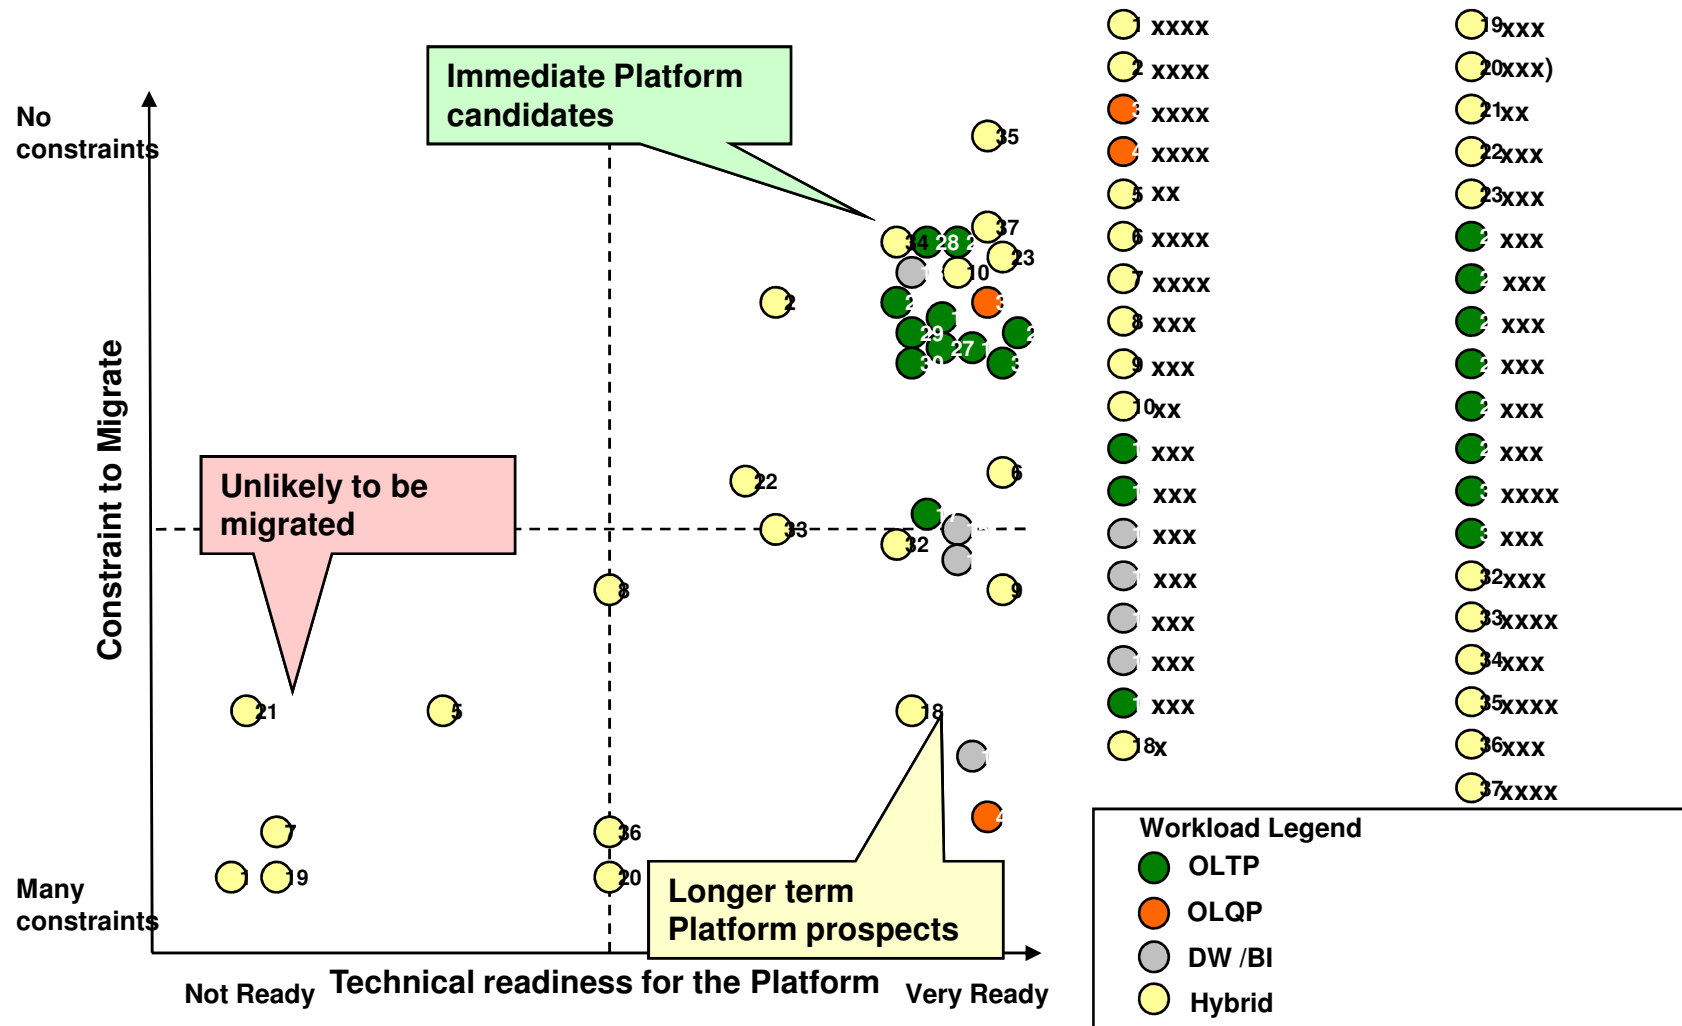

The Data Warehouse Evolution

What are Oracle's customers deploying today?

Approach: Candidate App Selection

Applications are in various states of Platform 'readiness' – most remediation was minor Clusters of Oracle based applications ready for Platform migration were apparent

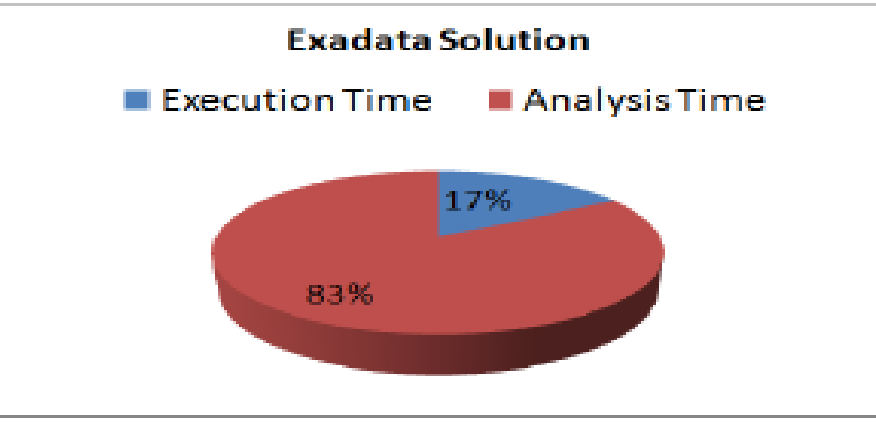

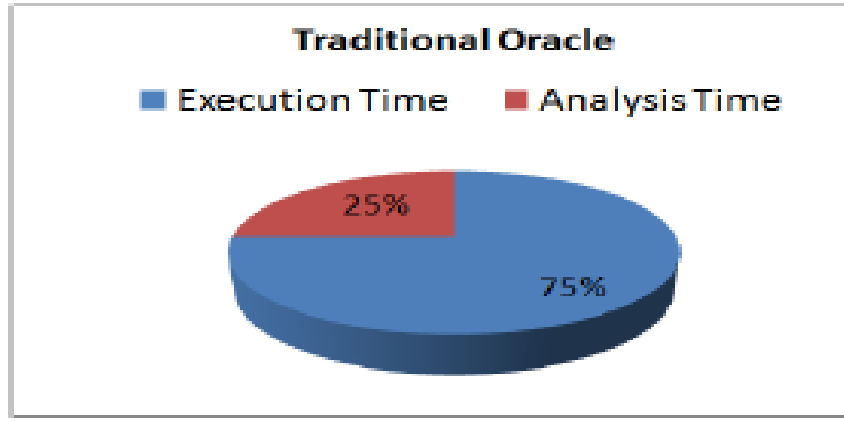

Published ISVs Exa Ready

www.cvidya.com

The Exadata Impact

Test area	Improvement Factor on ¼ Exadata V2-2
Data Transformation	5.4x
Data Loading	19.6x
CDR Reconciliation	6.5x
Query time	80s – 4s

SAP ON ORACLE

Oracle Exadata Now Certified by SAP **New!**

All SAP products based on SAP NetWeaver 7.x that are also certified for Oracle Database 11g Release 2 can now be used with the Oracle Exadata Database Machine. For more information, see SAP Note [1590515](#) and the [Oracle white paper](#). 10 Jun 2011

Oracle Linux 5 Certified by SAP **New!**

Unicode versions of SAP products based on SAP NetWeaver 7.0x are now certified for Oracle Linux 5 (as of Update 5) on x86_64 platforms using Oracle Database 11g Release 2.

ORACLE

Oracle Roadmap To Cloud Methodology Can Be Used To Guide The Main Steps Of Consolidation

Source: Oracle Analysis 2012 May

Cross industry verticals

Customer statements

- **Telco**, Exadata improved our ETL processes significantly 72x
- **Banking**, Exadata improved Siebel CRM performance by eight times
- **Insurances**, Exadata changed the performance needed significantly
- **Retail**, Exadata allows us to create dynamic reports on the fly
- **Government**, with Exadata we escaped from legacy systems
- **Utilities**, With Exadata we improved DWH and OLTP including our back-up
- **Media**, with Exadata we process hundred of orders in EBS 24/7
- **Manufacturing**, We measured an incredible performance gain for SAP
- **Market Research**, Exadata allowed us to manage our growth
- **Consulting**, Migration to Exadata from multiple DBs to just one instance
- **Airline**, Exadata and OBIEE enhance business agility and competitiveness
- **Travel Transport**, Exadata fits OLTP and DWH, ad-hoc queries in seconds
- **Oil Gas**, Exadata provides significant cost savings for servers and storage
- **Professional Services**, Exadata is the smartest solution on the market

ORACLE

The Business Value

A Target Architecture That Fits Into The Concept And Ensures Business Continuity

Exadata is competitive...

- much faster than IBM and HP
- less storage intensive than EMC
- Best platform for Oracle Databases
- **Platinum Services 24x7 Included**

<http://www.oracle.com/us/support/premier/engineered-systems-solutions/platinum-services/overview/index.html>

References statements, Exadata is ...

<http://www.oracle.com/us/corporate/customers/customersearch/index.html?Keyword=exadata>

- **enables more detailed analysis**

- **eliminates slow application response**

- **reduces CAPEX costs via consolidation and enables Cloud**

ORACLE

Engineered Systems

ISV Value Proposition Oracle Exadata Database Machine

Value to the Customer

Significant performance improvements for core business processes 2x or more

Reduced implementation time with less system integration efforts from months down to <1 week

Shortened preparation time on ISV release upgrades based on pre-integrated solution readiness

Less budget on maintenance, more headcount time on new projects

Better CAPEX and OPEX because of cost savings on server, storage, power supply and room space

Value to the Partner

Increased solution competitiveness, more market share from competition

Significantly reduced ISV application deployment time at new customers

Increased readiness for existing customers migrating faster to latest release of ISV application leading into improved customer loyalty

Less maintenance efforts as customers running a unified environment

More margin based on overall TCO advantage minimizing discounting needs on software

ORACLE

Engineered Systems

SI value Proposition Oracle Exadata Database Machine

Value to the Customer

Significant performance improvements for core business processes 10x

Reduced implementation time with less system integration efforts from months down to weeks or days

Shortened apps release upgrades on pre-integrated solution readiness

Less budget on maintenance, more headcount time on new projects

Better CAPEX and OPEX because of cost savings on server, storage, power supply and room space

Value to the Partner

Increased solution competitiveness, from <20% to >200% before/after, more market share from competition

Significantly more time for advanced implementation services such as DR, Security, Manageability

More references

More new projects

More margin on more software and more advanced services versus lower daily standard services rates

ORACLE

Conclusions and Next Steps

Conclusions for Customers and Partners

Engineered Systems

- **Exadata is driving Engineered Systems**
- **Technical Workshops with Oracle**
- **References in all industries >200, 1b\$ May 12**
- **Exadata ISV readiness and optimized**
- **More new projects faster delivered for customers with ISVs and SIs certified**

Next Steps

Engineered Systems

- **Scope your first project on Oracle Workshop**
- **Identify a partner**
- **Fly-in or Drive-out for technology demonstration**
- **Call a reference**
- **Run the new project in weeks not months**
- **Meet your business department requirements sooner**

Super Cluster

- **About OSC**, Oracle's EMEA Technology Solution Center in Reading UK provides the capability to test Exadata, the most advanced technology in the area of data warehouse and OLTP. OSC provides the capability for partners and connected customers to verify the performance of the fastest hardware & software combined solution – towards real end customer's environments.
- **Demo**, half day, enables demo with sample data for one or more customers, on-site in UK for a customer delegation or remotely connected at Oracle offices
- **Workshops**, full day, more in-depth demo for one or more customers
- **Customer PoCs or Benchmarks**, enables a one or multiple weeks engagement with customer data from 1 to 5 TB, for testing on Exadata that delivers the fastest possible performance for customers business
