

Hibridne mobilne aplikacije u APEX-u

Marko Gorički

marko.goricki@biolog.hr

<http://apexbyg.blogspot.com/>

Sažetak

- Zašto mobilne aplikacije?
- Native vs Web vs Hybrid
- PhoneGap Framework
- PhoneGap i APEX
- Zaključak

Zašto mobilne aplikacije?

CO18
group

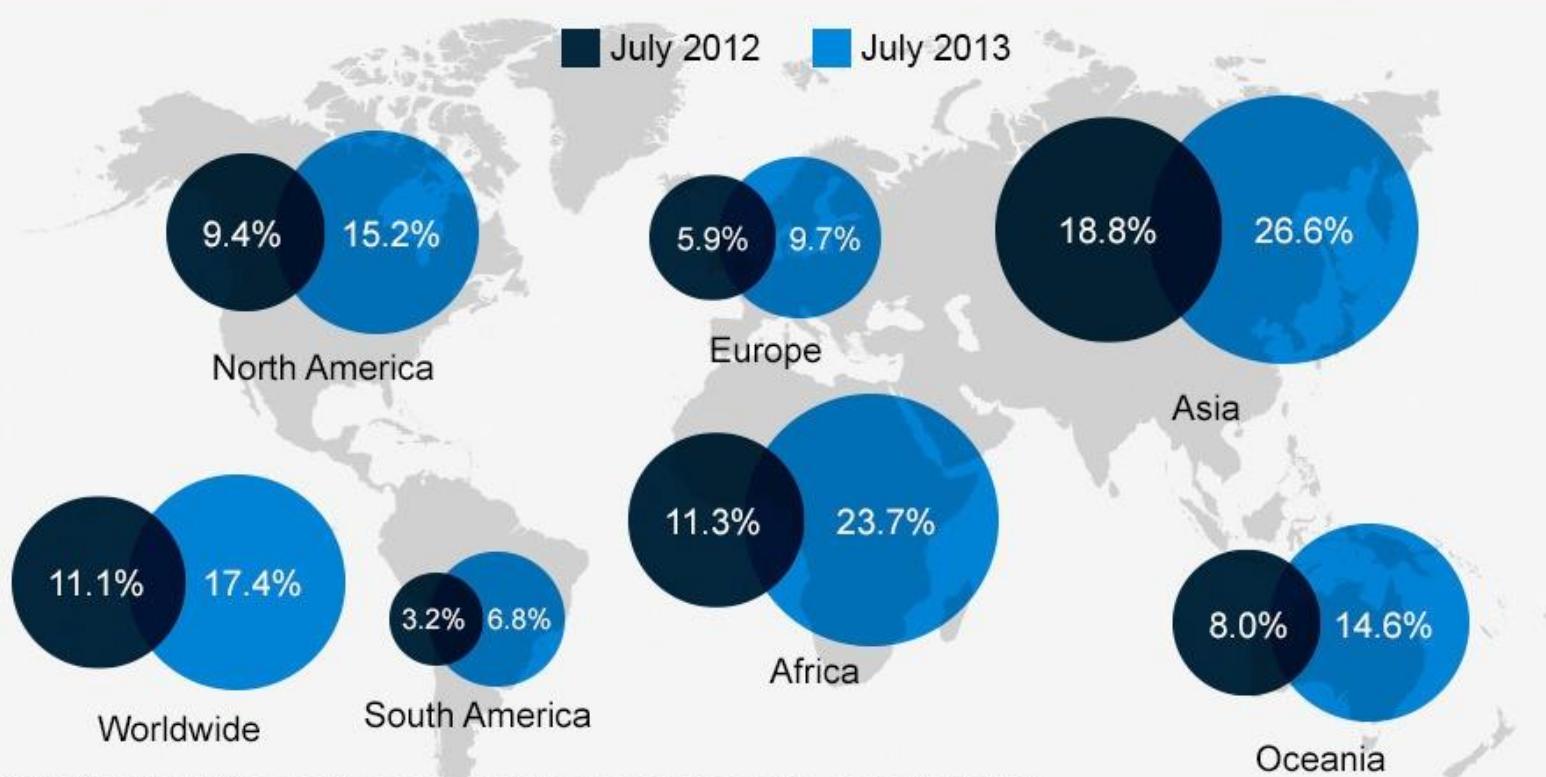

- 80% svjetske populacije posjeduje mobilni uređaj
- 91% Amerikanaca posjeduje mobilni uređaj, od toga je 63% pametnih telefona
- Više od 91 milijuna pametnih telefona u SAD-u
- U svijetu ima više mobilnih uređaja nego računala
- Dnevno se aktivira više Android uređaja nego što se rodi djece – oko 700 000

Zašto mobilne aplikacije?

CO18
group

Mobile Phones Account for 17% of Global Web Usage

Percentage of page views coming from mobile devices*

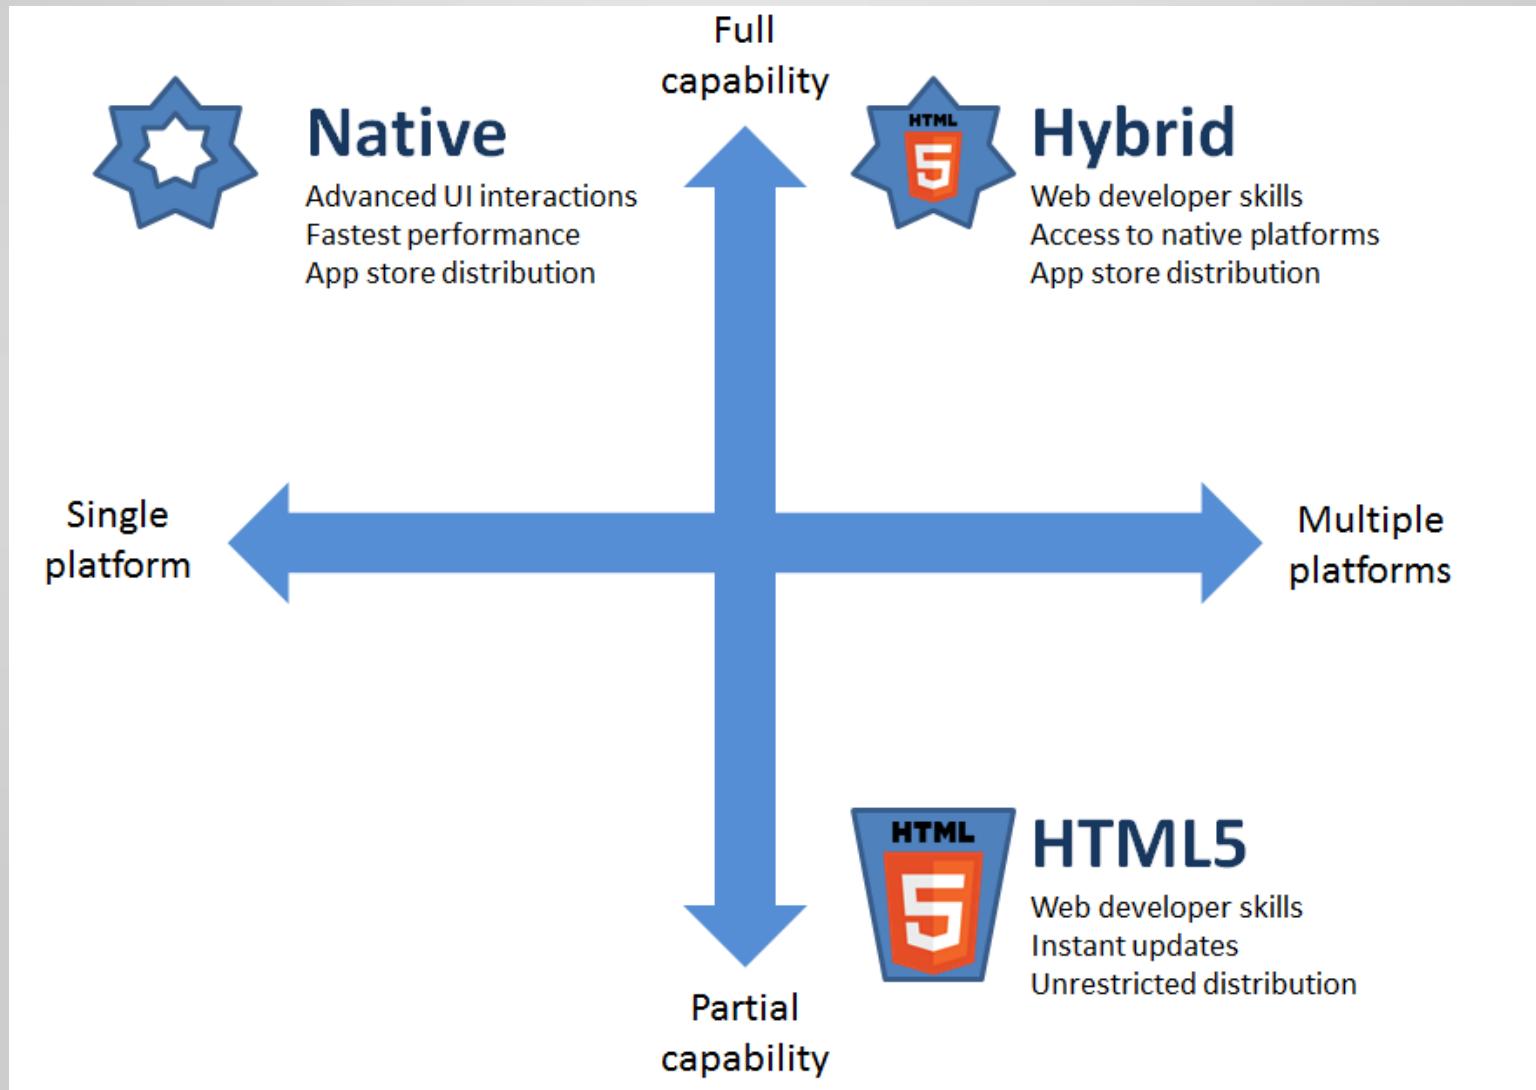

* StatCounter defines mobile as a pocket-sized computing device, excluding tablets

Zašto mobilne aplikacije?

CO18
group

- Razvoj mobilnih uređaja – iPhone (2007.), Android (2008.)
- Sve veća upotreba mobilnih uređaja i tableta u poslovnom svijetu
- Potreba od strane krajnjih korisnika
- Dostupnost aplikacije 24/7
- Mobilni Internet (3G – 20Mbps, 4G – 75Mbps+)

Mogućnosti

Native

PROS:

- bolje performanse
- korištenje svih funkcionalnosti uređaja
- UI prilagođen uređaju, poznat korisnicima
- distribucija (App store)
- pozadinski rad
- implicitna instalacija na ekranu uređaja
- dostupne offline

CONS:

- poseban razvoj za svaku platformu
- distribucija (ažuriranje aplikacije)
- proces odobravanja (App store)

Web (HTML5)

PROS:

- jedna aplikacija za sve platforme
- poznate tehnologije (HTML, CSS, JS)
- cijena i vrijeme izrade i održavanja
- brzo ažuriranje – aplikacija na serverskoj strani
- nije potreban proces odobravanja (App store)
- responsive Web dizajn (Web + mobile)
- UI Framework (jQuery Mobile, Dojo, Sencha Touch) - "*write less, do more*,,,
- offline rad korištenjem HTML5 (Web storage, App cache - manifest)

CONS:

- pristup samo nekim funkcionalnostima uređaja (GPS, kamera)
- jedinstven UI
- brzina i renderiranje u preglednicima
- pozadinski rad
- distribucija (nema App Storea)

Hibridne aplikacije

OO18
group

- Kombinacija HTML5 + native (API)

PROS:

- jedna aplikacija, više platformi
- korištenje gotovo svih funkcionalnosti uređaja
- poznata tehnologija (HTML, CSS, JS)

CONS:

- problematičan proces odobravanja (App store)
- performanse ovise o brzini preglednika

PhoneGap Framework

OO18
group

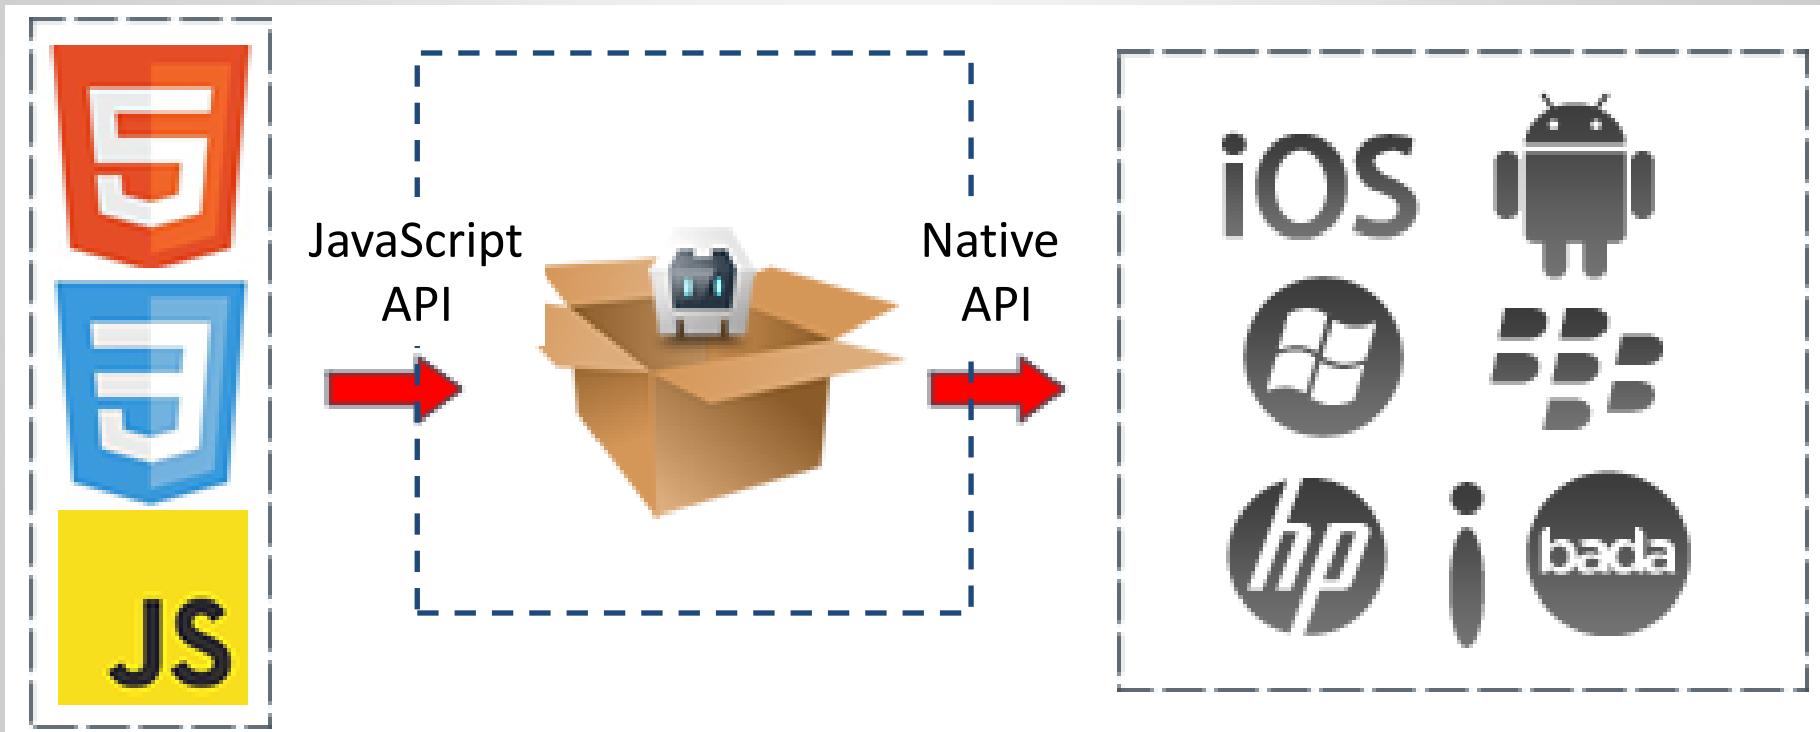

- Besplatan alat za izradu višeplatformskih mobilnih aplikacija (HTML5, CSS i JS)
- Distribucija Apache Cordove (koristi ga i Oracle ADF Mobile)
- Sadrži API koji omogućava pristup OS-u uređaja (JS)
- 2 sloja:
 - JS sa standardiziranim metodama za sve platforme
 - API sučelje napisano u jeziku uređaja

PhoneGap Framework

OO18
group

- PhoneGap arhitektura:

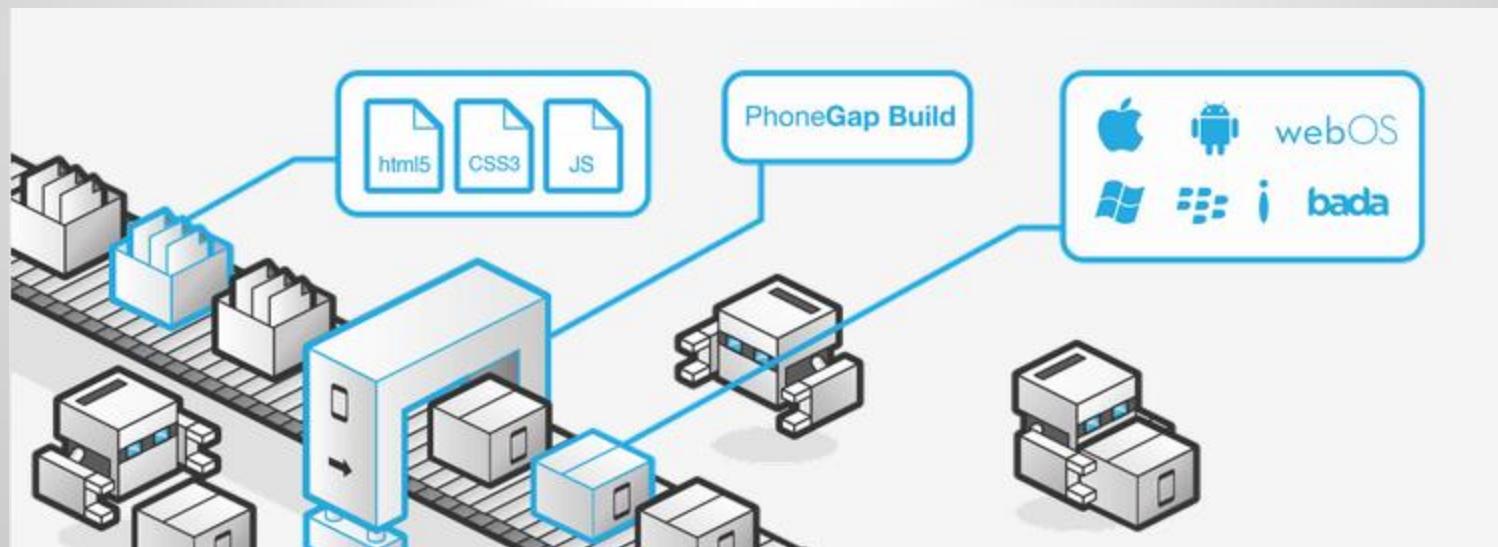

PhoneGap Framework

	iPhone (iOS)	Android	Blackberry OS 6.0+	Windows Phone 7 + 8
Accelerometer	✓	✓	✓	✓
Camera	✓	✓	✓	✓

 - Java JDK
 - Android SDK
 - ADT plugin
 - PhoneGap

APEX i PhoneGap

- Eclipse - kreiranje Android projekta

New Android Application

New Android Application

Creates a new Android Application

Application Name: HROUG

Project Name: HROUG

Package Name: hr.bilog.hroug

Minimum Required SDK: API 8: Android 2.2 (Froyo)

Target SDK: API 18

Compile With: API 16: Android 4.1 (Jelly Bean)

Theme: Holo Light with Dark Action Bar

 Choose a target API to compile your code against, from your installed SDKs. This is typically the most recent version, or the first version that supports all the APIs you want to directly access without reflection.

The screenshot shows the Eclipse IDE interface with the following details:

- Package Explorer:** On the left, it displays the project structure for "hr.bilog.hroug". The `MainActivity.java` file is selected in the `src/com.example.hr.bilog.hroug` package.
- Code Editor:** On the right, the `MainActivity.java` file is open. The code is as follows:

```
activity_main.xml MainActivity.java
```

```
package com.example.hr.bilog.hroug;

import android.os.Bundle;

public class MainActivity extends Activity {

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
    }

    @Override
    public boolean onCreateOptionsMenu(Menu menu) {
        // Inflate the menu; this adds items to the action bar if it is present.
        getMenuInflater().inflate(R.menu.main, menu);
        return true;
    }
}
```

PhoneGap i APEX

A screenshot of an Oracle APEX application interface. At the top, there is a search bar with a magnifying glass icon, a 'Go' button, a navigation menu icon, an 'Actions' dropdown, a 'Reset' button, and a 'Create' button with a right-pointing arrow. Below this is a table with the following columns: Name, Mime Type, Size, Application, Updated, Updated By, and Download. There is one row visible: 'cordova.js' under Name, 'application/javascript' under Mime Type, '184,652' under Size, '57497' under Application, 'Now' under Updated, 'USER' under Updated By, and a download icon under Download.

Name	Mime Type	Size	Application	Updated	Updated By	Download
cordova.js	application/javascript	184,652	57497	Now	USER
